## PROFILE

Full Stack Developer skilled in MERN, Tailwind CSS, and UI/UX.Building clean, scalable web apps with modern tech.

## EDUCATION

United University                                                                                            *U.P, India*

**Bachelor of computer applications(B.C.A)**                                                  2023 – 2026

- Web-development Enthusiast.
- Relevant coursework in [Relevant Subjects: Web Development, Java Programming, etc.]

## SKILLS

**Technical:** FRONT-END, BACK-END, DATABASE, UI/UX, SEO, Version control, Hosting.

**Tools:** HTML, CSS, JAVASCRIPT, TAILWIND CSS, REACT JS, MERN STACK, FIGMA, LIGHTROOM, NEXT JS, PM2, HOSTING, WORDPRESS, Postman Api, Git/GitHub etc.

## CERTIFICATIONS

- CCNA certification Simplilearn – *([link](link))*
- Google play Store listing Certificate – (*[link](link)*)

## EXPERIENCE

YBI Foundation (intern)                                                                              *Prayagraj, India*

**AI, machine learning**                                                                              June 16- August15

- Assisted in building and training machine learning models using real-world datasets.
- Performed data preprocessing and basic analysis to improve model accuracy.
- Gained experience with tools like Python, scikit-learn, and TensorFlow.

EC council (intern online )                                                                         *Prayagraj, India*

**web pentester**                                                                                        June 1- July 24

- Conducted vulnerability assessments on web applications to identify security flaws.
- Used tools like Burp Suite and OWASP methodologies for testing.
- Reported findings with recommendations to improve application security.

## PROJECTS

**Internship platform**                                                                               05/25- 06/25

- Developed a fully responsive multi-page website using React.js and Tailwind CSS
- Implemented React Router for smooth navigation between Home, About, Services, Testimonials, and Contact pages
- Integrated form submission with a Node.js/Express backend and MongoDB for data handling
- Deployed the project on Vercel with automated GitHub CI/CD workflow
- Applied modern UI/UX principles including gradient backgrounds, hover effects, and animated transitions

**Dummy DataGenerator**                                                                          29/06-29/06

- Created a backend app using Express.js and MongoDB..
- Helped test APIs and simulate real-world database operations.

## ACHIEVEMENTS

- Established a 1k+ member community – [LinkedIn](LinkedIn)
- Google Store listing certificate and Copilot certificate from Microsoft.
- Part of Google Developer Program.
